## CUSTOMER CARE

### Thank you for choosing Baxi Fires Division

All Baxi Fires Division heaters are designed to meet the most stringent quality, performance and safety requirements to provide our customers with many years of trouble free service. This guide aims to improve your understanding and appreciation of your new Baxi Fires Division heater, by providing simple and informative instructions to enable you to install it and to ensure that you benefit from the excellent performance and features it has to offer.

If you require further assistance, the **Baxi Fires Division Technical Helpline** will be pleased to help.

Please telephone **08706 061 065** (local rates apply in the United Kingdom). In the Republic of Ireland please telephone **0044 8706 061 065**.

FOR OTHER USEFUL TELEPHONE NUMBERS SEE PAGE 17 OF THIS GUIDE.

Because our policy is one of constant development and improvement, details may vary slightly from those given in this publication

# INSTALLER AND OWNER GUIDE

## **Safety First.**

Baxi Fires Division heaters are CE Approved and designed to meet the appropriate British Standards and Safety Marks.

## **Quality and Excellence.**

All Baxi Fires Division heaters are manufactured to the highest standards of quality and excellence and are manufactured under a BS EN ISO 9001 quality system accepted by the British Standards Institute.

## HANDLING AND UNPACKING

Before continuing any further with the installation of this heater please read the following:

### **Important instructions.**

- The lifting weight of the heater is as below:

<u>Model</u>	<u>Heater Body (kg)</u>	<u>Fascia (kg)</u>	<u>Spacer (kg)</u>	<u>Total (kg)</u>
Chic	5.9 kg.	3 kg.	0.66 kg.	9.56kg.
Serenity	5.9 kg.	6.5 kg.	1.3 kg.	13.7 kg.
Twilight	5.9 kg.	8.0 kg.	0.9 kg.	14.8kg.
Envy	5.9 kg.	3.11 kg.	0.66 kg.	9.67kg.
Mirage	5.9 kg.	3.60 kg.	0.66 kg.	10.16kg.

# INSTALLER AND OWNER GUIDE

- One person should be sufficient to lift the heater. If for any reason this weight is considered too heavy then obtain assistance.
- When lifting always keep your back straight. Bend your legs and not your back.
- Avoid twisting at the waist. It is better to reposition your feet.
- Avoid upper body / top heavy bending. Always bend from the knees rather than the waist. Do not lean forward or sideways whilst handling the heater.
- Always grip with the palm of the hand. Do not use the tips of fingers for support.
- Always keep the heater as close to the body as possible. This will minimise the cantilever action.
- Use gloves to provide additional grip.
- Always use assistance if required.

## SAFETY

### Always

- **Always** install the heater in accordance with this guide. If in doubt obtain expert advice.
- **Always** make sure the electrical socket is accessible and located adjacent to, but not above or behind the heater.
- **Always** disconnect the heater from the electrical supply before carrying out cleaning, maintenance or replacing the light bulb.
- **Always** make sure the heater is firmly secured to prevent it from being tipped over.
- **Always** use a fireguard when young children and infirm persons can come into contact with the heater.
- **Always** use genuine Baxi Fires Division spares.

### Never

- **Never** leave children unsupervised in a room where the heater is ON and unguarded.
- **Never** obstruct or cover the fan outlet or force items into heater openings.
- **Never** install or use the heater anywhere where water is in use, i.e. Bathrooms, Kitchens, Shower Rooms, Swimming Pools etc.
- **Never** use aerosols or steam cleaners on or around the heater.
- **Never** route the electric cable under carpet etc.
- **Never** install the heater close to curtains or combustible materials.
- **Never** use the heater to dry clothes etc.
- **Never** sit or stand on the heater.

# INSTALLER AND OWNER GUIDE

## FITTING THE HEATER

**The installation of this heater requires a reasonable level of DIY skills. Please read this guide thoroughly before commencing installation and if in doubt, seek help from a competent person**

### **Do I need any tools?**

1. Depending upon the chosen method of installation you may need the following screwdrivers: -
  - **1 off Pozidrive / Phillips / cross head.** This should have a number 2 size tip.
  - **1 off Flat end.**
2. If drilling into brickwork you will need a power drill (preferably with hammer action) and appropriate size drill bit for the wallplugs supplied.

### **Where can I fit the heater?**

There should be at least 50mm (2 inches) clearance between the top of the fascia and anything such as a shelf, fireplace surround or mantel etc. This will allow the fascia to be lifted off or removed during servicing. To check this gently place the fascia against the surface to which it is to be fixed. Measure the distance from the top of the fascia.

#### **Chic, Envy, Mirage and Serenity models.**

The heater can be fitted into fireplaces or surrounds where the following dimensions are available.

Width	390mm - 450 mm (15.35 inches - 17.72 inches)
Height	555mm - 590 mm (21.9 inches - 23.2 inches)
Depth	At least 75mm (At least 3 inches)

The heater can also be fitted against against a flat wall. A spacer frame is supplied with the heater.

#### **Twilight model.**

The heater **cannot** be fitted into fireplaces / fireplace openings. It is intended for installation to a flat wall. A spacer frame is supplied with the heater.

# INSTALLER AND OWNER GUIDE

## Important Electrical Safety

The heater must **not** be located in front of or under an electrical socket, the socket must always be accessible in order to disconnect the heater from the electrical supply for maintenance and cleaning.

**Important! This heater must be earthed.**

- The heater is supplied with a 3 pin 13 Amp fused re-wireable plug with 1mm<sup>2</sup> 3 core cable.
- The wires in the cable are coloured in accordance with the following code: -
  - Live = Brown
  - Neutral = Blue
  - Earth = Green /Yellow
- The electric supply must be safely routed from the heater to an electrical socket.

## Moving the Cable

At the base of the heater you will find the electric cable which runs through a rectangular plastic cable guide. The cable can be moved to the opposite side if required. To do this please see below:

1. To open the cable guides push and lift the tab on the bottom of them and the cable guides will open (See figure 1- Item 2).
2. Place the cable into the opposite guide and close the bases.

If the electric cable is damaged, to avoid a hazard it must be replaced by a Baxi Fires Division authorised service agent, or similarly qualified person (See page 17).

All external wiring between the heater and the electrical supply shall comply with current IEE regulations.

## Fascia support brackets.

As supplied the fascia support brackets may be flat against the heater body. Using a suitable tool or gloved hand bend the brackets as in figure 2.

Figure 1. Moving the cable.

Figure 2. Fascia support brackets

# INSTALLER AND OWNER GUIDE

## Heater Fixing.

All of the fixings and loose parts supplied with the heater have been identified as in figure 3.

Additional fixings may be required if fitting the heater to a plasterboard wall that has a wooden frame behind it. In such cases we recommend the use of heavy duty cavity fixings. If fitting the heater in an elevated position (i.e. above hearth or finished floor height) then the lower support bracket must be fitted (See figure 3).

**The heater must always be fixed into position to prevent it from being tipped over**  
The following fixing options are available:

### Chic, Envy, Serenity and Mirage models.

- Screw Fixing** • To a fireplace opening / surround
- To a flat wall with the use of the spacer frame
- Wire Fixing** • To a fireplace opening / surround

### Twilight model.

- Screw Fixing** • To a flat wall with the use of the spacer frame

If fitting the heater into a fireplace or surround opening, try the heater in the opening to ensure that it will fit.

# INSTALLER AND OWNER GUIDE

If fitting the heater onto a decorative hearth surface such as marble or tile it is advisable to protect the hearth surface. Do not drag the heater across the surface of the hearth as this may scratch the hearth surface.

## Method A - Screw fixing to a fireplace opening.

Note - If fixing to marble it is recommended that Method B - 'Wire fixing to a fireplace opening' is used. Drilling marble without the correct tools and experience may result in the marble cracking.

1. Place the heater into the fireplace or surround opening. Make sure that the heater is in the middle of the surround or fireplace.
2. There are two slotted holes in the top of the heater (See figure 4). Mark through the slotted holes so that their position is clear when the heater is removed.
3. Remove the heater.
4. Drill an appropriate size hole in each of the marked positions. Insert wall plugs into the drilled holes.
5. Place the heater so that the slotted holes are in line with the wallplugs in the fixing surface.
6. Screw and secure the heater with two woodscrews (See figure 3).

Figure 4. Slots for screw fixing.

## Method B - Wire Fixing to a fireplace opening.

This method of fixing is recommended when fixing the heater to a marble surround or where the wall or brickwork is in poor condition.

1. The fixing kit supplied with the heater includes a steel wire, wall plug and eyescrew (See figure 3). These can be used to secure the heater to the back of a fireplace opening.
2. Mark the eyescrew position on the centre line at the back of the fireplace opening and at a height of 533-560mm (21 inches - 22 inches) (See figure 5).
3. Drill an appropriate size hole in the marked position.
4. Insert a wallplug into the drilled hole.
5. Screw the eyescrew into the wallplug.
6. Position the heater in front of the fireplace opening.
7. At the top of the heater there are four small holes, two each side of the heater (See figure 6- Item 1). From the front of the heater, thread about 50mm (2 inches) of the steel wire into the inside small hole on the left side of the heater (See figure 6 - item 2).
8. Thread the other end of the wire through the remaining small hole on the left hand side of the heater. Continue to push the wire through this hole until there is only a small loop of wire at the front of the heater (See figure 6 - item 3).

# INSTALLER AND OWNER GUIDE

9. At the back of the heater there will be a long piece and a short piece of wire coming through the two holes. Hold the short piece and give the long piece a gentle tug. This will secure the steel wire. Take the long piece and thread this through the eyescrew in the back of the fireplace opening (See figure 6 - item 4).

10. From the back of the heater thread the long piece of steel wire through the outer small hole on the right hand side of the heater (See figure 6 - item 5).

11. Locate the heater in the fireplace opening, then from the front of the heater, gently pull the steel wire on the right hand side to gather up the excess until the heater is secure. Thread the wire through the remaining small hole to lock the wire and heater in place (See figure 6 - item 6).

## Method C - Screw fixing to a flat wall.

If the heater is to be mounted on to a plasterboard wall that has a wooden frame behind it then the integrity and ability of the wall to carry the weight of the appliance must be confirmed. It is important that any vapour control barrier is not damaged, and that the structural members of the house are not damaged.

Figure 5. Eyescrew position.

Figure 6. Steel wire fixing

# INSTALLER AND OWNER GUIDE

## Preparing the heater for installation.

**Twilight model** - The spacer frame will need to be fitted to the heater at this point using the nine black screws provided (See figure 7).

**Chic, Envy, Mirage and Serenity model** - The spacer frame is supplied with three magnets. Locate one magnet centrally on the inside of each of the three sides. Locate the spacer frame over the back of the heater ensuring that the cut-outs for the cable at the rear of the heater. Be careful not to damage the cable.

The heater must be secured to the wall using the hanging bracket supplied.

**Please note** that when mounting to a plasterboard wall that has a wooden frame behind it then suitable wall fixings will be required. Although not supplied with the heater we recommend the use of heavy duty cavity fixings. For conventional brick walls plastic plugs and woodscrews are supplied.

The distance from the centre of the holes in the wall hanging bracket to the bottom of the heater on Serenity, Envy, Mirage and Chic models or the fascia on the Twilight model is shown in figure 8. This is important if wall mounting the heater so that the bottom sits on a hearth or finished floor level.

Figure 7. Fitting the spacer frame to the Envy and Twilight heater

Figure 8. Hanging bracket heights from finished floor / hearth

# INSTALLER AND OWNER GUIDE

## Fitting the heater.

1. Decide the location of the heater.
2. If the heater is to be fixed in an elevated position (i.e. above hearth or finished floor height) then secure the lower support bracket to the rear bottom of the heater (See figure 9).
3. If fitting to a conventional brick wall then use the outer slotted holes in the bracket. If fitting to a plasterboard wall that has a wooden frame behind it then use all four fixing holes in the bracket. This is required to spread the load. Mark the positions of the hanging bracket holes on the wall.
4. Drill the marked positions using a suitable sized drill bit for the chosen fixings.
5. Insert the wall plugs / fixings and secure the bracket to the wall using suitable screws.
6. Hang the heater body on the hanging bracket. There is a electric cable slot on both sides of the spacer frame. If the heater is located on a hearth then pass the electric cable through the required slot.

## The Copper Reflector.

### What is the Copper Reflector?

The Copper Reflector is the copper coloured plate that sits in front of the light bulbs. It is not fitted to the heater but supplied loose in the pack.

### What is it for?

It enhances the appearance of the flame effect. It is made removeable in order to access the light bulbs.

### How do I fit it?

It simply drops into the shaped slot in front of the light bulbs (See figure 10). Remove any protective film before use.

# INSTALLER AND OWNER GUIDE

## Fitting the fascia.

### Twilight fascia only.

1. There is a fuel bed support supplied with the Twilight heater. Slip this between the glass and metal panel on the rear of the fascia opening as shown in figure 11.

### Serenity fascia only.

1. There are two foam pads supplied with the heater. Locate the pads into the rear of the fascia as in figure 12.

### All models.

1. There are two hooked brackets on the top rear of the fascia. Locate the hooks into the brackets at the top of the heater (See figure 13).

2. The fascia is secured using the two screws with bright metal finish. These are located as in figure 14.

Figure 11. Fitting the fuel support bracket to the Twilight fascia.

Figure 13. Fitting the fascia (Fascia may differ from that shown).

Figure 12. Fitting the foam pads on the Serenity model

# INSTALLER AND OWNER GUIDE

## Chic fascia only.

1. Supplied in the fascia pack are two tubular trim sets. The lower trim set has a flat plate fitted to the rear. Hang the upper and lower trim sets as in figure 15.
2. The lower section of the fascia is secured with magnets. Locate it as in figure 16.

## Mirage fascia only.

1. Supplied in the fascia pack is a three bar trim. Hang this at the bottom of the fascia (See figure 15).
2. The lower section of the fascia is secured with magnets. Locate it as in figure 16.
3. Supplied in the fascia pack is a canopy trim. Hang this at the top of the fascia (See figure 17).

# INSTALLER AND OWNER GUIDE

## **Envy fascia only.**

1. Supplied in the fascia pack is a canopy trim. Hang this at the top of the fascia (See figure 17).
2. Hang the lower trim at the bottom of the fascia (See figure 18).

## **Fitting the fuel support.**

1. Locate the fuel support as in figure 19.
2. Place the loose pebbles onto the fuel support. It is not necessary to use all the pebbles supplied.

### **Important Note:**

**The pebbles are for decorative purposes only. There is a choke risk to young children. Make sure they cannot gain access to them.**

Figure 18. Fitting the 'Envy' lower trim.

Figure 19. Fuel support location (Fascia not shown for clarity).

# INSTALLER AND OWNER GUIDE

## USING THE HEATER

### Important Safety

**Never cover the heater or obstruct the openings at the base of the heater, this could cause overheating and consequent risk of fire.**

### What are the three switches for?

The heater is operated by three switches located below the hood on the right hand side of the heater.

Switch 1 =  Main On - Off

In the On position only the fuel effect operates

Switch 2 =  1kW fan heat setting and fuel effect

Switch 3 =  2kW fan heat setting and fuel effect

The switches are mechanically interlocked, so when switch 1 is turned off, all switches turn off.

## CLEANING AND MAINTAINING THE HEATER

### How do I Clean my heater?

The heater fascia, spacer frame and glass parts need only to be wiped clean with a dry soft cloth, do not use polishes or abrasive materials.

### I have a problem with my heater!

#### Important Safety

**Before undertaking maintenance or replacing the light bulb(s) always disconnect the heater from the electricity supply by removing the 3 pin plug and allowing the heater to cool.**

#### 1. My heater is on but there is no light or the light appears brighter on one side of the heater.

This is possibly a light bulb failure. Remove the light bulb(s) as follows and check it / them in a table lamp that is known to work. If it / they do not work in the table lamp then replace as below.

The light bulbs fitted to this heater are standard clear 40W max. E14 candle lamps, but

# INSTALLER AND OWNER GUIDE

due to the indeterminate life span and ease of replacement, they are specifically excluded from the guarantee.

## **To replace the light bulb(s).**

1. To gain access to the light bulb/s, remove the loose coals / pebbles from the fuel support and place them onto an old newspaper or plastic bag. This will prevent them from marking the surface.

2. Remove the firefront, On the Twilight model it will be necessary to remove the whole fascia. Remove the fascia in the reverse order to that shown in the 'Fitting the fascia' section of this guide.

Figure 20. Bulb replacement

3. Remove the black cover plate. To do this remove the two screws from the front of the cover plate.

4. Remove the copper reflector plate.

5. Replace the light bulb/s with clear 40 Watt (maximum) candle, Edison screw, SES E14.

6. Refit the copper reflector plate. Refit the cover plate / fascia / firefront and coals / pebbles.

## **2. My heater is on but there is no light or heat.**

The first thing to do is check the wall socket. To do this plug in a known working appliance. If the appliance you have plugged in works then there is a good chance that the problem lies with the 13Amp fuse in the heater plug. If either fuse or socket is suspected, have them checked by an electrician.

## **3. My heater is on but there is no heat.**

A cut out device is fitted to the heater to prevent damage due to over heating. If it operates due to an obstruction in the airflow, the heater must be turned off and allowed to cool for 15 minutes and the obstruction removed before restarting.

# INSTALLER AND OWNER GUIDE

## 4. I Have a problem that is different to those in the previous examples 1- 3.

Following is a list of useful telephone numbers.

For general advice about your heater:

**BAXI FIRES DIVISION TECHNICAL HELPLINE      08706 061 065.**

To report faults or arrange for your heater to be serviced:

**BAXI FIRES DIVISION SERVICE      08706 090 081.**

For sales or product information:

**BAXI FIRES DIVISION SALES      08706 061 067.**

CALLERS IN THE REPUBLIC OF IRELAND

**Call      0044 8706 061 065**

For spares inquiries

**Spare parts are available nationwide via the ‘interpart stockist network’. For your local stockist consult Yellow pages under ‘Central Heating’.**

When ordering spare parts please have the below information available. This will help us to deal with your call quicker and avoid you having to make a second call.

- Your Post Code
- Type of Heater (Electric or gas)
- The fault, problem or request.
- Model, Name and serial number (This information can be found on a small label on the lower left of the heater next to the cover plate. To see this you may have to remove the fascia).

## What should I do when I’m ready to dispose of my heater?

The plug should be removed from the mains cable and the mains cable cut from the heater. These should be disposed of with the heater.

### Environmental Protection.

Waste electrical products should not be disposed of with household waste. Please recycle where facilities exist. Check with your local authority or retailer for recycling advice.
